*The consolidated financial statements of the Group as of and for the year ended December 31, 2023 were audited by another independent auditor whose report No. 01057/2.1133/AU.1/10/0259-2/1/III/2024 dated March 28, 2024, expressed an unmodified opinion on those consolidated financial statements, prior to restatements as discussed in the Emphasis of a Matter's paragraph.*

#### Other Information

*Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.*

*In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.*

*When we read the 2024 annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions based on the applicable laws and regulations.*

#### Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Grup.

### **Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian**

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.

*In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.*

*Those charged with governance are responsible for overseeing the Group's financial reporting process.*

### **Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

*Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.*

*As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We Also:*

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.
- Memeroleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit Grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.*
- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*
- *Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.*

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

*We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.*

**Laporan Kepatuhan Terhadap Peraturan Perundang-Undangan dan Pengendalian Internal**

Kami juga melakukan pengujian atas kepatuhan Perusahaan terhadap peraturan perundang-undangan tertentu dan pengendalian internal. Kepatuhan terhadap peraturan perundang-undangan tertentu dan pengendalian internal adalah tanggung jawab manajemen. Tanggung jawab kami terletak pada pernyataan kesimpulan atas kepatuhan terhadap peraturan perundang-undangan dan pengendalian internal berdasarkan audit kami. Pengujian atas kepatuhan terhadap peraturan perundang-undangan tertentu dan pengendalian internal tersebut kami laksanakan berdasarkan Standar Pemeriksaan Keuangan Negara yang diterbitkan Badan Pemeriksa Keuangan Republik Indonesia dan Pernyataan Standar Audit No. 62 (Seksi 801) yang ditetapkan oleh Institut Akuntan Publik Indonesia.

Laporan kepatuhan terhadap peraturan perundang-undangan dan pengendalian internal disampaikan secara terpisah kepada manajemen, masing-masing dalam laporan kami No. R/0422.AAT/MHW/2025 dan No. R/0423.AAT/MHW/2025 tanggal 25 September 2025.

**Report on the Compliance to Regulation and Internal Control**

*We also have tested on the Company compliance with certain laws and regulations and internal controls. The compliance with certain laws and regulations and internal controls are the responsibility of the management. Our responsibility is to express a conclusion on the compliance with certain laws and regulations and internal controls based on our audit. Testing of the compliance with certain laws and regulations and internal controls that we performed were in accordance with State Financial Auditing Standards established by the Supreme Audit Board of the Republic of Indonesia and Statement of Standards on Auditing No. 62 (Section 801) established by the Indonesian Institute of Certified Public Accountants.*

*The reports of compliance to certain regulations and internal controls, are submitted to the management, separately in our reports No. R/0422.AAT/MHW/2025 and No. R/0423.AAT/MHW/2025 dated September 25, 2025.*

**c. Principles of consolidation**

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Thus, the Group controls an investee if and only if the Group has all of the following:

- i. Power over the investee, that is existing rights that give the Group current ability to direct the relevant activities of the investee,
- ii. Exposure, or rights, to variable returns from its involvement with the investee, and
- iii. The ability to use its power over the investee to affect its returns

- i. Pengaturan kontraktual dengan pemilik hak suara lainnya dari *investee*,
- ii. Hak yang timbul atas pengaturan kontraktual lain, dan
- iii. Hak suara dan hak suara potensial yang dimiliki Grup.

Grup menilai kembali apakah mereka mengendalikan *investee* bila fakta dan keadaan mengindikasikan adanya perubahan terhadap satu atau lebih dari ketiga elemen dari pengendalian. Konsolidasi atas entitas-entitas anak dimulai sejak Grup memperoleh pengendalian atas entitas anak dan berakhir pada saat Grup kehilangan pengendalian atas entitas anak. Aset, liabilitas, penghasilan dan beban dari entitas anak yang diakuisisi pada tahun tertentu disertakan dalam laporan keuangan konsolidasian sejak tanggal Grup memperoleh kendali sampai tanggal Grup tidak lagi mengendalikan entitas anak tersebut.

Seluruh laba rugi dan setiap komponen penghasilan komprehensif lain ("PKL") diatribusikan pada pemilik entitas induk dan pada kepentingan nonpengendali ("KNP"), walaupun hal ini akan menyebabkan saldo KNP yang defisit. Bila dipandang perlu, penyesuaian dilakukan terhadap laporan keuangan entitas anak untuk diselaraskan dengan kebijakan akuntansi Grup.

Seluruh aset dan liabilitas, ekuitas, penghasilan dan beban dan arus kas atas transaksi antar anggota Grup dieliminasi sepenuhnya pada saat konsolidasi.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian, dicatat sebagai transaksi ekuitas.

Jika Grup kehilangan pengendalian, maka Grup:

semata dari pembayaran pokok dan bunga (solely payments of principal and interest - SPPI) dari jumlah pokok terutang.

Aset keuangan ini diukur pada jumlah yang diakui pada awal pengakuan dikurangi dengan pembayaran pokok, kemudian dikurangi atau ditambah dengan jumlah amortisasi kumulatif atas perbedaan jumlah pengakuan awal dengan jumlah pada saat jatuh tempo, dan penurunan nilainya.

Pendapatan keuangan dihitung dengan metode menggunakan suku bunga efektif dan diakui di laba rugi. Perubahan pada nilai wajar diakui di laba rugi ketika aset dihentikan atau direklasifikasi.

Aset keuangan yang diklasifikasikan menjadi aset keuangan yang diukur pada biaya perolehan diamortisasi dapat dijual ketika terdapat peningkatan risiko kredit. Penghentian untuk alasan lain diperbolehkan namun jumlah penjualan tersebut harus tidak material jumlahnya atau tidak sering.

ii. Aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain ("FVTOCI")

Aset keuangan diukur pada FVTOCI jika kedua kondisi berikut terpenuhi:

1. Aset keuangan dikelola dalam model bisnis yang tujuannya akan terpenuhi dengan mendapatkan arus kas kontraktual dan menjual aset keuangan; dan
2. Persyaratan kontraktual dari aset keuangan tersebut memberikan hak pada tanggal tertentu atas arus kas yang semata dari pembayaran pokok dan bunga (*solely payments of principal and interest* – SPPI) dari jumlah pokok terutang.

Aset keuangan tersebut diukur sebesar nilai wajar, di mana keuntungan atau kerugian diakui dalam penghasilan komprehensif lain, kecuali untuk kerugian akibat penurunan nilai dan keuntungan atau kerugian akibat perubahan kurs, diakui pada laba rugi. Ketika aset keuangan tersebut dihentikan pengakuannya atau direklasifikasi, keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam

and interest ("SPPI") on the principal amount outstanding.

The financial asset is measured at the amount recognized at initial recognition minus principal repayments, plus or minus the cumulative amortization of any difference between that initial amount and the maturity amount, and any loss allowance.

Interest income is calculated using the effective interest method and is recognized in profit or loss. Changes in fair value are recognized in profit or loss when the asset is derecognized or reclassified.

Financial assets classified to amortized cost may be sold where there is an increase in credit risk. Disposals for other reasons are permitted but such sales should be immaterial in value or infrequent in nature.

ii. Financial assets measured at fair value through other comprehensive income ("FVTOCI")

The financial assets are measured at FVTOCI if these conditions are met:

1. Financial asset is held within a business model whose objective is achieved by both collecting contractual cashflows and selling financial assets; and
2. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

The financial assets are measured at fair value. The changes in fair value are recognized initially in other comprehensive income (OCI), except for impairment gains and losses, and a portion of foreign exchange gains and losses, are recognized in profit or loss. penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi.

**iii. Aset keuangan yang diukur pada nilai wajar melalui laba rugi ("FVTPL")**

Aset keuangan yang diukur pada FVTPL adalah aset keuangan yang tidak memenuhi kriteria untuk diukur pada biaya perolehan diamortisasi atau untuk diukur FVTOCI.

Setelah pengakuan awal, aset keuangan yang diukur pada FVTPL diukur pada nilai wajarnya. Keuntungan atau kerugian yang timbul dari perubahan nilai wajar aset keuangan diakui dalam laba rugi.

Aset keuangan berupa derivatif dan investasi pada instrumen ekuitas tidak memenuhi kriteria untuk diukur pada biaya perolehan diamortisasi atau kriteria untuk diukur pada FVTOCI, sehingga diukur pada FVTPL. Namun demikian, Grup dapat menetapkan pilihan yang tidak dapat dibatalkan saat pengakuan awal atas investasi pada instrumen ekuitas yang bukan untuk diperjualbelikan dalam waktu dekat (*held for trading*) untuk diukur pada FVTOCI. Penetapan ini menyebabkan semua keuntungan atau kerugian disajikan di penghasilan komprehensif lain, kecuali pendapatan dividen tetap diakui di laba rugi. Keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi ke saldo laba tidak melalui laba rugi.

**Pengukuran selanjutnya liabilitas keuangan**

Grup mengklasifikasikan seluruh liabilitas keuangan sehingga setelah pengakuan awal liabilitas keuangan diukur pada biaya perolehan diamortisasi, kecuali:

- Liabilitas keuangan pada nilai wajar melalui laba rugi. Liabilitas dimaksud, termasuk derivatif yang merupakan liabilitas, selanjutnya akan diukur pada nilai wajar.
- Liabilitas keuangan yang timbul saat pengalihan aset keuangan yang tidak memenuhi kualifikasi penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan.

equity are reclassified from equity to profit or loss as a reclassification adjustment.

**iii. Financial assets at fair value through profit or loss ("FVTPL")**

Financial assets measured at FVTPL are those which do not meet both for neither amortized costs nor FVTOCI.

After initial recognition, FVTPL financial assets are measured at fair value. The changes in fair value are recognized in profit or loss.

Financial assets in the form of derivatives and investment in equity instruments are not eligible to meet both criteria for amortized costs or FVTOCI. Hence, these are measured at FVTPL. Nonetheless, the Group irrevocably designated an investment in an equity instrument which is not held for trading in any time soon as FVTOCI. This designation results in gains and losses to be presented in other comprehensive income, except for dividend income on a qualifying investment which is recognized in profit or loss. Cumulative gains or losses previously recognized in other comprehensive income are reclassified to retained earnings, not to profit or loss.

**Subsequent measurement of financial liabilities**

The Group shall classify all financial liabilities as subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.
- Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies.

**Penurunan nilai aset keuangan**

Grup mengakui kerugian kredit ekspektasian untuk aset keuangan yang diukur pada biaya perolehan diamortisasi dan aset keuangan yang diukur pada FVTOCI.

Pada setiap tanggal pelaporan, Grup mengukur penyisihan kerugian instrumen keuangan sejumlah kerugian kredit ekspektasian sepanjang umurnya jika risiko kredit atas instrumen keuangan tersebut telah meningkat secara signifikan sejak pengakuan awal. Namun, jika risiko kredit instrumen keuangan tersebut tidak meningkat secara signifikan sejak pengakuan awal, maka mengakui sejumlah kerugian kredit ekspektasian 12 bulan.

Grup menerapkan metode yang disederhanakan untuk mengukur kerugian kredit ekspektasian tersebut terhadap piutang usaha dan aset kontrak tanpa komponen pendanaan yang signifikan.

Grup menganggap aset keuangan gagal bayar ketika pihak ketiga tidak mampu membayar kewajiban kreditnya kepada Grup secara penuh. Periode maksimum yang dipertimbangkan ketika memperkirakan kerugian kredit ekspektasian adalah periode maksimum kontrak di mana Grup terekspos terhadap risiko kredit.

Penyisihan kerugian diakui sebagai pengurang jumlah tercatat aset keuangan kecuali untuk aset keuangan yang diukur pada FVTOCI yang penyisihan kerugiannya diakui dalam penghasilan komprehensif lain. Sedangkan jumlah kerugian kredit ekspektasian (atau pemulihan kerugian kredit) diakui dalam laba rugi, sebagai keuntungan atau kerugian penurunan nilai.

Pengukuran kerugian kredit ekspektasian dari instrumen keuangan dilakukan dengan suatu cara yang mencerminkan:

**Impairment of financial assets**

The Group recognizes expected credit loss for its financial assets measured at amortized costs and financial assets measured at FVTOCI.

At the end of each reporting date, the Group calculates any impairment provision in financial instruments based on its lifetime expected credit loss if the credit risk of the financial instruments has increased significantly since its initial recognition. However, if credit risk has not increased significantly since initial recognition, then 12 months expected credit loss is recognized.

The Group applied a simplified approach to measure such expected credit loss for trade receivables and contract assets without significant financing component.

The Group considers a financial asset to be in default when the counterparty is unlikely to pay its credit obligations to the Group in full. The maximum period considered when estimating expected credit loss is the maximum contractual period over which the Group is exposed to credit risk.

Impairment losses are recognized as a deduction in financial assets' carrying amount, except for financial assets measured at FVTOCI where its impairment is recognized in other comprehensive income. The expected credit loss (or recovery of credit loss) is recognized in profit or loss, as gains or losses of financial asset impairment.

The expected credit loss of financial instruments are conducted by a means which reflect:

Aset keuangan dapat dianggap tidak mengalami peningkatan risiko kredit secara signifikan sejak pengakuan awal jika aset keuangan memiliki risiko kredit yang rendah pada tanggal pelaporan. Risiko kredit pada instrumen keuangan dianggap rendah ketika aset keuangan tersebut memiliki risiko gagal bayar yang rendah, peminjam memiliki kapasitas yang kuat untuk memenuhi kewajiban arus kas kontraktualnya dalam jangka waktu dekat dan memburuknya kondisi ekonomi dan bisnis dalam jangka waktu panjang mungkin, namun tidak selalu, menurunkan kemampuan peminjam untuk memenuhi kewajiban arus kas kontraktualnya. **Metode suku bunga efektif**

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset atau liabilitas keuangan (atau kelompok aset atau liabilitas keuangan) dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas masa depan selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh jumlah tercatat neto dari aset keuangan atau liabilitas keuangan. Credit risk on financial instrument December be considered be low if there is a low risk of default, the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term December, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. To determine whether a financial asset has a low credit risk, the Group use internal credit risk rating or external assessment. For example, a financial asset with “*investment grade*” according to external assessment has a low credit risk rating, thus it does not experience an increase in significant credit risk since initial recognition.

**Effective interest method**

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discount estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimate cash flows by considering all contractual terms of the financial instrument, for example, accelerated

**Pengukuran nilai wajar**

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Nilai wajar aset dan liabilitas keuangan diestimasi untuk keperluan pengakuan dan pengukuran atau untuk keperluan pengungkapan.

Nilai wajar dikategorikan dalam level yang berbeda dalam suatu hirarki nilai wajar berdasarkan pada apakah input suatu pengukuran dapat diobservasi dan signifikansi input terhadap keseluruhan pengukuran nilai wajar:

- i. Harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran (Level 1);
- ii. Input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung maupun tidak langsung (Level 2);

**Netting a financial asset and a financial liability**

A financial asset and financial liability shall be offset when and only when, the Group currently has a legally enforceable right to net off the recognized amount; and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

**Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

Fair values are categorised into different levels in a fair value hierarchy based on the degree to which the inputs to the measurement are observable and the significance of the inputs to the fair value measurement in its entirety:

- i. Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date (Level 1);
- ii. Inputs other than quoted prices included in Level 1 that are observable for the assets or liabilities, either directly or indirectly (Level 2);

Perpindahan antara level hirarki nilai wajar diakui oleh Grup pada akhir periode pelaporan di mana perpindahan terjadi.

**i. Persediaan**

Persediaan dinyatakan berdasarkan jumlah terendah antara biaya perolehan dan nilai realisasi neto. Biaya persediaan terdiri dari seluruh biaya pembelian, biaya konversi, dan biaya lain yang timbul sampai persediaan berada dalam kondisi dan lokasi saat ini. Biaya perolehan ditentukan dengan metode rata-rata tertimbang (*weighted average method*). Nilai realisasi neto merupakan taksiran harga jual dalam kegiatan usaha biasa dikurangi estimasi biaya penyelesaian dan estimasi biaya yang diperlukan untuk membuat penjualan.

Setiap penurunan nilai persediaan di bawah biaya perolehan menjadi nilai realisasi neto dan seluruh kerugian persediaan diakui sebagai beban pada periode terjadinya penurunan atau kerugian tersebut. Setiap pemulihan kembali penurunan nilai persediaan karena peningkatan kembali nilai realisasi neto, diakui sebagai pengurangan terhadap jumlah beban persediaan pada periode terjadinya pemulihan tersebut.

**j. Beban panen yang akan datang**

Beban panen yang akan datang merupakan biaya tanaman yang telah dikeluarkan untuk tanaman tebu berupa biaya pembibitan, biaya tanaman, pemeliharaan tanaman, dan peralatan-peralatan pabrik yang digunakan dalam penanaman yang akan panen dalam satu tahun yang akan datang maupun dua tahun yang akan datang untuk siap digiling sebagai bahan baku gula.

When measuring the fair value of an asset or a liability, the Group uses market observable data to the extent possible. If the fair value of an asset or a liability is not directly observable, the Group uses valuation techniques that appropriate in the circumstances and maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.

Transfers between levels of the fair value hierarchy are recognised by the Group at the end of the reporting period during which the change occurred.

**i. Inventories**

Inventories are carried at the lower of cost and net realizable value. The cost of inventories comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make sales.

The amount of any write-down of inventories to net realizable value and all losses of inventories shall be recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realizable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

**j. Future harvest expense**

Future harvest expense is the cost of plant that has been expensed for the sugarcane crop in the form of the cost of seedling, the cost of the plant, plant maintenance, and manufacturing equipment used in planting that will be harvested in the coming year or two years to come to be ready to be processed as raw material of sugar.

Nilai wajar dari ayam yang belum menghasilkan diukur berdasarkan nilai wajar yang mendekati biaya perolehan ditambah dengan biaya yang terjadi selama masa pertumbuhan. Biaya perolehan ditambah dengan akumulasi biaya yang terjadi selama masa pertumbuhan tersebut akan direklasifikasi ke masa produksi pada saat mencapai usia produksi. Pada umumnya ayam pedaging mencapai masa produksi setelah berumur 25 minggu. Ayam yang telah menghasilkan diukur berdasarkan nilai wajar yang mendekati biaya perolehan pada saat direklasifikasi dari ayam yang belum menghasilkan.

yang telah menghasilkan dipindahbukukan sebagai tanaman menghasilkan dan disajikan dalam kelompok aset tetap. Umur ekonomis dari tanaman menghasilkan adalah 25 tahun. Beban yang terkait dengan tanaman tersebut yang sifatnya pemeliharaan dibebankan pada laba rugi tahun berjalan.

**n. Aset tetap**

Aset tetap pada awalnya diakui sebesar biaya perolehan yang meliputi harga perolehannya dan setiap biaya yang dapat diatribusikan langsung untuk membawa aset ke kondisi dan lokasi yang diperlukan agar aset siap digunakan sesuai intensi manajemen.

Apabila relevan, biaya perolehan juga dapat mencakup estimasi awal biaya pembongkaran dan pemindahan aset tetap dan restorasi lokasi aset tetap, kewajiban tersebut timbul ketika aset tetap diperoleh atau sebagai konsekuensi penggunaan aset tetap selama periode tertentu untuk tujuan selain untuk memproduksi persediaan selama periode tersebut.

Setelah pengakuan awal, aset tetap kecuali tanah dinyatakan sebesar biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Tanah diukur menggunakan metode revaluasi. Penilaian terhadap tanah tersebut dilakukan oleh penilai independen eksternal. Penilaian atas aset tersebut dilakukan secara berkala untuk memastikan bahwa nilai wajar aset yang direvaluasi tidak berbeda secara material dengan nilai tercatatnya.

Jika jumlah tercatat tanah meningkat akibat revaluasi, maka kenaikan tersebut diakui dalam penghasilan komprehensif lain dan terakumulasi dalam ekuitas pada bagian surplus revaluasi. Surplus revaluasi aset tetap yang termasuk dalam ekuitas dialihkan langsung ke saldo laba ketika aset tersebut dihentikan pengakuannya. Pengalihan surplus revaluasi ke saldo laba tidak dilakukan melalui laba rugi.

Penyusutan aset tetap dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung

already harvesting are reclassified to mature plantation and are presented in the fixed asset account. The economic life of mature plantation is 25 years. Expenses related with these plants for maintenance purpose are charged to profit or loss for the year.

**n. Fixed assets**

Fixed assets are initially recognized at cost, which comprises its purchase price and any cost directly attributable in bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by management.

When applicable, the cost may also comprises the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

After initial recognition, fixed assets, except land, are carried at its cost less any accumulated depreciation, and any accumulated impairment losses.

Land is measured using the revaluation method. The land appraisal was carried out by an external independent appraiser. Valuation of these assets is carried out periodically to ensure that the fair value of the revalued assets does not differ materially from their carrying value.

If the carrying amount of land increases as a result of revaluation, the increase is recognized in other comprehensive income and accumulated in equity under revaluation surplus. The revaluation surplus of property, plant, and equipment included in equity is directly transferred to retained earnings when the asset is derecognized. The transfer of the revaluation surplus to retained earnings is not made through profit or loss.

Depreciation of fixed assets starts when available for use and was computed by

**o. Sewa**

Grup Sebagai Penyewa (Lessee)

Pada tanggal inisiasi suatu kontrak, Grup menilai apakah suatu kontrak merupakan, atau mengandung, sewa. Suatu kontrak merupakan, atau mengandung sewa jika kontrak tersebut memberikan hak untuk mengendalikan penggunaan suatu aset identifikasi selama suatu jangka waktu untuk dipertukarkan dengan imbalan. Untuk menilai apakah suatu kontrak memberikan hak untuk mengendalikan suatu aset identifikasi, Grup menilai apakah:

- a. Kontrak melibatkan penggunaan suatu aset identifikasi – ini dapat ditentukan secara eksplisit atau implisit dan secara fisik dapat dibedakan atau mewakili secara substansial seluruh kapasitas aset yang secara fisik dapat dibedakan. Jika pemasok memiliki hak substitusi substantif, maka aset tersebut tidak teridentifikasi;
- b. Grup memiliki hak untuk memperoleh secara substansial seluruh manfaat ekonomi dari penggunaan aset selama periode penggunaan; dan
- c. Grup memiliki hak untuk mengarahkan penggunaan aset identifikasi. Grup memiliki hak ini ketika hak pengambilan keputusan yang paling relevan untuk mengubah bagaimana dan untuk tujuan apa aset tersebut digunakan. Dalam kondisi tertentu di mana semua keputusan tentang bagaimana dan untuk tujuan apa aset digunakan telah ditentukan sebelumnya, Grup memiliki hak untuk mengarahkan penggunaan aset tersebut jika:
  - Grup memiliki hak untuk mengoperasikan aset; atau
  - Grup mendesain aset dengan cara menetapkan sebelumnya bagaimana dan untuk tujuan apa aset akan digunakan.

Pada tanggal inisiasi atau pada saat penilaian kembali suatu kontrak yang mengandung suatu komponen sewa, Grup mengalokasikan imbalan dalam kontrak ke

**o. Lease**

The Group as Lessee

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- a. The contract involves the use of an identified asset – this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has the substantive substitution right, then the asset is not identified;
- b. The Group has the right to obtain substantially all the economic benefits of the use of assets during the period of use; and
- c. The Group has the right to direct the use of the identified asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In certain circumstances where all the decisions about how and for what purpose the asset is used are predetermined, the Group has the right to direct the use of the asset if either:
  - The Group has the right to operate the asset; or
  - The Group designed the asset in a way that predetermines how and for what purpose the asset will be used.

At inception date or on reassessment of a contract that contains a lease component, the Group allocates consideration in the

masing-masing komponen sewa  
berdasarkan harga tersendiri relatif dari  
komponen sewa.

Pembayaran sewa yang termasuk dalam  
indeks liabilitas sewa meliputi: pembayaran  
sewa tetap, sewa variabel yang bergantung  
pada indeks, jumlah yang akan dibayarkan  
dalam jaminan nilai residu dan harga  
eksekusi opsi beli, opsi perpanjangan atau  
penalti penghentian jika Grup cukup pasti  
akan mengeksekusi opsi tersebut.

Grup mengakui aset hak guna dan liabilitas  
sewa pada tanggal dimulainya sewa. Aset  
hak guna awalnya diukur pada biaya  
perolehan, yang terdiri dari jumlah  
pengukuran awal dari liabilitas sewa  
disesuaikan dengan pembayaran sewa  
yang dilakukan pada atau sebelum tanggal  
permulaan, ditambah dengan biaya  
langsung awal yang dikeluarkan, dan  
estimasi biaya untuk membongkar dan  
memindahkan aset pendasar atau untuk  
merestorasi aset pendasar atau tempat di  
mana aset berada, dikurangi insentif sewa  
yang diterima.

Setelah tanggal permulaan, Grup mengukur  
aset hak guna dengan model biaya, yaitu  
biaya perolehan dikurangi akumulasi  
penyusutan dan akumulasi kerugian  
penurunan nilai, serta disesuaikan dengan  
pengukuran kembali liabilitas sewa. Aset  
hak guna disusutkan dengan menggunakan  
metode garis lurus.

Jika sewa mengalihkan kepemilikan aset  
pendasar pada akhir masa sewa atau jika  
biaya perolehan aset hak guna  
merefleksikan penyewa akan  
mengeksekusi opsi beli, maka penyewa  
menyusutkan aset hak guna dari tanggal  
permulaan hingga akhir umur manfaat aset  
pendasar, yang mengacu pada ketentuan  
masa manfaat aset tetap. Jika tidak, maka  
aset hak guna disusutkan dari tanggal  
permulaan hingga tanggal yang lebih awal  
antara akhir umur manfaat aset hak guna  
atau akhir masa sewa.

Liabilitas sewa awalnya diukur pada nilai  
kini atas pembayaran sewa yang belum  
dibayar pada tanggal permulaan,  
didiskontokan menggunakan suku bunga  
implisit dalam sewa atau, jika suku bunga

contract to each lease component on the  
basis of their relative stand-alone prices.

Lease payments included in the  
measurement of the lease liability comprise  
the following: fixed payments, variable lease  
payments that depend on an index, amounts  
expected to be payable under a residual  
value guarantee and the exercise price  
under a purchase option, optional renewal  
period or penalties for early termination of a  
lease unless the Group is reasonably certain  
not to terminate early.

The Group recognizes a right-of-use asset  
and a lease liability at the lease  
commencement date. The right-of-use asset  
is initially measured at cost, which  
comprises the initial amount of the lease  
liability adjusted for any lease payments  
made at or before the commencement date,  
plus any initial direct costs incurred and an  
estimate of costs to dismantle and remove  
the underlying asset or to restore the  
underlying asset or the site on which it is  
located, less any lease incentives received.

After the commencement date, the Group  
measures the right-of-use assets under the  
cost model, which is cost less accumulated  
depreciation and accumulated impairment  
losses, and adjusted for remeasurement of  
lease liabilities. Right-of-use asset  
depreciated using straight line method.

If the lease transfers ownership of the  
underlying asset to the lessee by the end of  
the lease term or if the cost of the right-of-  
use asset reflects that the lessee will  
exercise a purchase option, the lessee shall  
depreciate the right-of-use asset from the  
commencement date to the end of the useful  
life of the underlying asset, which refers to  
the terms of the useful life of the fixed asset.  
Otherwise, the lessee shall depreciate the  
right-of-use asset from the commencement  
date to the earlier of the end of the useful life  
of the right-of-use asset or the end of the  
lease term.

The lease liability is initially measured at the  
present value of the lease payments that are  
not yet paid at the commencement date,  
discounted using the interest rate implicit in  
the lease or, if that rate cannot be readily

tersebut tidak dapat ditentukan, digunakan suku bunga pinjaman incremental Grup. Umumnya, Grup menggunakan suku bunga pinjaman inkremental sebagai suku bunga diskonto.

Setelah tanggal permulaan, Grup mengukur liabilitas sewa dengan:

- Meningkatkan jumlah tercatat untuk merefleksikan bunga atas liabilitas sewa;
- Mengurangi jumlah tercatat untuk merefleksikan sewa yang telah dibayar; dan
- Mengukur kembali jumlah tercatat untuk merefleksikan penilaian kembali atau modifikasi sewa atau untuk merefleksikan pembayaran sewa tetap secara substansi revisi.

Liabilitas sewa diukur kembali ketika ada perubahan pembayaran sewa masa depan yang timbul dari perubahan indeks atau suku bunga, jika ada perubahan estimasi Grup atas jumlah yang diperkirakan akan dibayar dalam jaminan nilai residual, atau jika Grup mengubah penilaiannya apakah akan mengeksekusi opsi beli, perpanjangan atau penghentian.

Ketika liabilitas sewa diukur kembali dengan cara ini, penyesuaian terkait dilakukan terhadap jumlah tercatat aset hak guna, atau dicatat dalam laba rugi jika jumlah tercatat aset hak guna telah berkurang menjadi nol.

Selanjutnya, pembayaran atas kontrak yang termasuk ke dalam pengecualian, yakni pembayaran atas sewa jangka pendek dan sewa aset bernilai rendah, diakui sebagai beban dengan menggunakan metode garis lurus selama masa sewa.

Grup Sebagai Lessor

Sewa di mana grup tidak mengalihkan secara substansial seluruh resiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi. Biaya langsung awal sehubungan proses negosiasi sewa operasi ditambahkan ke jumlah tercatat dari aset sewaan dan diakui sebagai beban selama masa sewa dengan dasar yang sama dengan pendapatan sewa. Pendapatan sewa operasi diakui sebagai pendapatan atas dasar garis lurus selama masa sewa. Biaya termasuk depresiasi yang timbul dalam mendapatkan penghasilan sewa diakui sebagai beban.

determined, The Group incremental borrowing rate. Generally, The Group uses its incremental borrowing rate as the discount rate.

After the commencement date, the Group shall measure the lease liability by:

- Increasing the carrying amount to reflect interest on the lease liability;
- Reducing the carrying amount to reflect the lease payments made; and
- Remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect revised in-substance fixed lease payments.

Lease liabilities is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in The Group estimate of the amount expected to be payable under a residual value guarantee, or if The Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use assets, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Furthermore, payments associated with contracts included in the exception, which are payments associated with all Short-term leases and certain leases of all low-value assets, will be recognized as an expense on a straight-line basis over the lease term.

The Group as Lessor

Leases where the group does not transfer substantially all the risks and rewards incidental to ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as rental income. Operating lease income is recognized as revenue on a straight-line basis over the lease term. Costs including depreciation incurred in earning rental income are recognized as expenses.

Properti Investasi adalah properti (tanah atau bangunan atau bagian dari suatu bangunan atau kedua-duanya) yang dikuasai oleh pemilik atau penyewa melalui aset hak-guna untuk menghasilkan rental atau untuk kenaikan nilai atau kedua-duanya, dan tidak untuk digunakan dalam produksi atau penyediaan barang atau jasa atau untuk tujuan administratif atau dijual dalam kegiatan usaha sehari-hari.

Properti investasi diakui sebagai aset jika dan hanya jika besar kemungkinan manfaat ekonomi masa depan yang terkait dengan properti investasi akan mengalir ke entitas; dan biaya perolehan properti investasi dapat diukur dengan andal.

Properti investasi pada awalnya diukur sebesar biaya perolehan, meliputi harga pembelian dan setiap pengeluaran yang dapat diatribusikan secara langsung (biaya jasa hukum, pajak pengalihan properti, dan biaya transaksi lain). Biaya transaksi termasuk dalam pengukuran awal tersebut.

Setelah pengakuan awal, Grup memilih menggunakan model nilai wajar dan mengukur seluruh properti investasi berdasarkan nilai wajar. Keuntungan atau kerugian yang timbul dari perubahan nilai wajar properti investasi diakui dalam laba rugi pada periode terjadinya.

Penentuan nilai wajar investasi didasarkan pada penilaian oleh penilai independen yang mempunyai kualifikasi profesional yang telah diakui dan relevan serta memiliki pengalaman terkini di lokasi dan kategori properti investasi yang dinilai.

Grup mengalihkan properti ke, atau dari, properti investasi jika, dan hanya jika, ketika properti memenuhi, atau berhenti memenuhi, definisi properti investasi dan terdapat bukti atas perubahan penggunaan, mencakup:

- Dimulainya penggunaan oleh pemilik, atau pengembangan untuk pemilik, untuk pengalihan dari properti investasi menjadi properti yang digunakan sendiri;
- Dimulainya pengembangan untuk dijual, untuk pengalihan dari properti investasi menjadi persediaan;

An investment property is derecognizes on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. Gains or losses arising from the retirement or disposal are determined as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss in the period of the retirement or disposal.

**q. Intangible assets**

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite life is recognized in the statement of profit or loss in the expense category that is consistent with the function of the intangible assets.

Amortization of intangible assets commences when the asset is available for use in accordance with its intended purpose and is calculated using the straight-line method based on the estimated useful lives of the intangible assets as follows:

Keuntungan atau kerugian yang timbul dari penghentian pengakuan suatu aset takberwujud diukur sebagai perbedaan antara jumlah neto hasil pelepasan dan jumlah tercatat dari aset dan diakui dalam laba rugi ketika aset dihentikan pengakuannya.

*Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the profit or loss when the asset is derecognized.*

**r. Penurunan nilai aset nonkeuangan**

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, Grup mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan ditentukan atas suatu aset individual, dan jika tidak memungkinkan, Grup menentukan jumlah terpulihkan dari unit penghasil kas dari aset tersebut.

Jumlah terpulihkan adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dengan nilai pakainya. Nilai pakai adalah nilai kini dari arus kas yang diharapkan akan diterima dari aset atau unit penghasil kas. Nilai kini dihitung dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan nilai waktu uang dan risiko spesifik atas aset atau unit yang penurunan nilainya diukur.

Jika, dan hanya jika, jumlah terpulihkan aset lebih kecil dari jumlah tercatatnya, maka jumlah tercatat aset diturunkan menjadi sebesar jumlah terpulihkan. Penurunan tersebut adalah rugi penurunan nilai dan segera diakui dalam laba rugi.

**s. Pajak penghasilan**

Beban pajak adalah jumlah gabungan pajak kini dan pajak tangguhan yang diperhitungkan dalam menentukan laba rugi pada suatu periode. Pajak kini dan pajak tangguhan diakui dalam laba rugi, kecuali pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui dalam penghasilan komprehensif lain atau secara

**r. Impairment of non-financial assets**

*At the end of each reporting period, the Group assess whether there is any indication that an asset may be impaired. If any such indication exists, the Group shall estimate the recoverable amount of the asset. Recoverable amount is determined for an individual asset, if its is not possible, the Group determines the recoverable amount of the asset's cash-generating unit.*

*The recoverable amount is the higher of fair value less costs to sell and its value in use. Value in use is the present value of the estimated future cash flows of the asset or cash generating unit. Present values are computed using pre-tax discount rates that reflect the time value of money and the risks specific to the asset or unit whose impairment is being measured.*

*If, and only if, the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. The reduction is an impairment loss and is recognized immediately in profit or loss.*

**s. Income tax**

*Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax. Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diharapkan berlaku ketika aset dipulihkan atau liabilitas diselesaikan, berdasarkan tarif pajak (dan peraturan pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan. Pengukuran aset dan liabilitas pajak tangguhan mencerminkan konsekuensi pajak yang sesuai dengan cara Grup memperkirakan, pada akhir periode pelaporan, untuk memulihkan atau menyelesaikan jumlah tercatat aset dan liabilitasnya.

**t. Employee benefit obligations**

Short-term Employee Benefits

Short-term employee benefits are recognized when an employee has rendered service during accounting period, at the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service. Short term employee benefits include such as wages, salaries, bonus and incentive.

Pension Plan Defined Contribution

The Group have defined contribution retirement plans covering all their qualified permanent employees.

A defined contribution pension program is one where the Group recognizes the contributions owed to the pension program or employee services after the employee has provided services to the Group for a specific period. The recognition and measurement are as follows:

- As a liability (accrued expense), after deducting the contributions owed for services rendered before the end of the reporting period, the company recognizes any excess as an asset (prepaid expense) as long as the excess will reduce future contribution payments or be refunded in cash;
- As an expense, unless another PSAK requires or permits the contributions to be included in the cost of acquiring an asset.

When the liabilities to the defined contribution program are not expected to be settled in full within twelve months after the end of the annual reporting period during which the employee rendered services, the liabilities are discounted using a discount rate that refers to the market yield on high-quality corporate bonds at the end of the reporting period.

**4. Pertimbangan, estimasi dan asumsi akuntansi yang signifikan**

Estimasi dan pertimbangan yang digunakan dalam penyusunan laporan keuangan terus dievaluasi berdasarkan pengalaman historis dan faktor lainnya, termasuk ekspektasi dari peristiwa masa depan yang diyakini wajar. Walaupun estimasi ini dibuat berdasarkan pengetahuan terbaik manajemen atas kejadian dan tindakan saat ini, hasil yang timbul mungkin berbeda dengan jumlah yang diestimasi semula. Asumsi dan pertimbangan yang memiliki pengaruh signifikan terhadap jumlah tercatat diungkapkan di bawah ini.

**Kerugian kredit ekspektasian**

Grup menilai penurunan nilai pada aset keuangan dengan biaya perolehan yang diamortisasi pada setiap tanggal pelaporan. Dalam menentukan apakah rugi penurunan nilai harus dicatat dalam laba rugi, manajemen harus mempertimbangkan informasi yang wajar dan didukung yang tersedia tanpa biaya atau upaya berlebihan pada tanggal pelaporan mengenai peristiwa masa lalu, kondisi kini, dan perkiraan kondisi ekonomi masa depan. Grup menerapkan pendekatan yang disederhanakan untuk mengukur kerugian kredit ekspektasian yang menggunakan *roll rate* dan *discounted cash flow* untuk menilai piutang usaha dan piutang lain-lain. Nilai tercatat kerugian kredit ekspektasian telah diungkapkan pada Catatan 8 dan 9.

**Penurunan nilai aset nonkeuangan**

Penurunan nilai muncul saat nilai tercatat aset atau unit penghasil kas melebihi nilai terpulihkannya, yang lebih besar antara nilai wajar dikurangi biaya untuk menjual dan nilai pakainya. Nilai wajar dikurangi biaya untuk menjual didasarkan pada ketersediaan data dari perjanjian penjualan yang mengikat yang dibuat dalam transaksi normal atas aset serupa atau harga pasar yang dapat diamati, dikurangi dengan biaya tambahan yang dapat diatribusikan dengan pelepasan aset.

**4. Consideration, estimates and significant accounting assumptions**

*The estimates and judgements used in the preparation of the financial statements are continuously evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions, the resulting results may differ from those initially estimated. Assumptions and considerations that have a significant effect on the carrying amount are disclosed below.*

**Estimated credit loss**

*Group assesses its financial assets measured at amortized cost for impairment at each reporting date. In determining whether an impairment loss should be recorded in profit or loss, management makes a judgement as to whether there is reasonable and supportable information that is available without undue cost or effort about past events, current conditions and forecasts of future conditions. Group applies simplified approach using roll rate and discounted cash flow to measuring account receivables and other receivables. The carrying amounts of the estimated credit loss is disclosed in Notes 8 and 9.*

**Impairment of non-financial assets**

*An impairment exists when the carrying value of an asset or a cash gain unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing the asset.*

**Nilai wajar properti investasi**

Grup mengukur nilai wajar properti investasi berdasarkan pendekatan nilai pasar dan pendapatan, dengan mempertimbangkan data transaksi properti sejenis, kondisi fisik aset, lokasi, serta potensi pendapatan masa depan. Manajemen menggunakan jasa penilai independen yang memiliki kompetensi dan pengalaman relevan untuk memastikan bahwa nilai wajar yang digunakan mencerminkan kondisi pasar terkini secara andal. Penentuan nilai wajar ini memerlukan pertimbangan profesional, terutama dalam memilih metode penilaian yang paling sesuai dan dalam menafsirkan data pasar yang tersedia.

Estimasi dan asumsi utama yang digunakan dalam penilaian wajar meliputi tingkat kapitalisasi, proyeksi arus kas, tingkat hunian, serta risiko pasar dan ekonomi yang dapat memengaruhi nilai properti. Perubahan terhadap asumsi-asumsi tersebut dapat berdampak signifikan terhadap jumlah tercatat properti investasi dan laba rugi periode berjalan. Oleh karena itu, manajemen secara berkala meninjau kembali asumsi dan metodologi yang digunakan untuk memastikan bahwa nilai wajar yang diakui tetap relevan dan dapat diandalkan. Nilai tercatat properti investasi telah diungkapkan pada Catatan 22.

For the years ended

*The value in use calculation is based on a discounted cash flow model. The future cash flow projection does not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash gain unit being tested.*

*The recoverable amount is most sensitive to the discount rate used for the expected future cash inflows and the growth rate used for extrapolation purposes.*

**The useful life of a fixed asset**

*The Group conducts periodic review of the economic useful lives of the assets based on factors such as technical conditions and future technological developments, if any. Future results of operations will be materially affected by changes in these estimates resulting from changes in the factors mentioned above. The carrying amounts of the useful life of an asset is disclosed in Note 23.*

**Fair value of investment property**

*The Group measures the fair value of investment properties using the market and income approaches, taking into account comparable property transaction data, the physical condition of the assets, location, and future income potential. Management engages independent appraisers with relevant competence and experience to ensure that the fair value applied reliably reflects current market conditions. The determination of fair value requires professional judgment, particularly in selecting the most appropriate valuation method and in interpreting the available market data.*

*The key estimates and assumptions used in fair value measurement include capitalization rates, cash flow projections, occupancy rates, as well as market and economic risks that may affect the value of the properties. Changes in these assumptions could have a significant impact on the carrying amount of investment properties and the profit or loss for the period. Therefore, management periodically reviews the assumptions and methodologies used to ensure that the recognized fair value remains relevant and reliable. The carrying amount of investment properties has been disclosed in Note 22.*

**Nilai wajar aset biologis**

Aset biologis diukur pada pengakuan awal dan pada tanggal pelaporan berikutnya pada nilai wajar dikurangi estimasi biaya penjualannya, kecuali jika Nilai Wajar tidak bisa diukur secara andal. Nilai wajar aset biologis didapatkan dari harga aset biologis tersebut pada pasar aktif. Pasar aktif (*active market*) adalah pasar di mana item yang diperdagangkan homogen, setiap saat pembeli dan penjual dapat bertemu dalam kondisi normal dan dengan harga yang dapat dijangkau. Nilai tercatat aset biologis telah diungkapkan pada Catatan 12.

**Revaluasi aset tetap tanah**

Perusahaan melakukan revaluasi atas aset tetap tanah untuk mencerminkan nilai wajar berdasarkan penilaian dari penilai independen yang kompeten. Proses ini melibatkan pertimbangan signifikan, termasuk frekuensi perubahan nilai pasar, kondisi fisik aset, serta ketersediaan data pasar yang dapat diandalkan. Revaluasi dicatat dalam ekuitas sebagai surplus revaluasi, kecuali jika terjadi penurunan nilai yang harus diakui dalam laba rugi.

Estimasi dan asumsi yang digunakan dalam revaluasi mencakup tingkat kapitalisasi, harga pasar terkini dari aset sejenis, serta proyeksi risiko ekonomi dan pasar properti. Perubahan dalam asumsi tersebut dapat berdampak material terhadap jumlah tercatat aset tetap dan posisi ekuitas perusahaan. Oleh karena itu, manajemen secara berkala meninjau kembali pendekatan dan asumsi yang digunakan untuk memastikan kewajaran nilai tercatat aset tetap pada Catatan 23.

**Perpajakan**

Grup beroperasi di bawah peraturan perpajakan di Indonesia. Pertimbangan yang signifikan diperlukan untuk menentukan provisi pajak penghasilan dan pajak pertambahan nilai. Apabila keputusan final atas pajak tersebut berbeda dari jumlah yang pada awalnya dicatat, perbedaan tersebut akan dicatat di laporan keuangan laba (rugi) dan penghasilan komprehensif lain pada periode di mana hasil tersebut dikeluarkan.

Sedangkan aset pajak tangguhan diakui atas jumlah pajak penghasilan terpulihkan pada periode mendatang sebagai akibat perbedaan temporer yang boleh dikurangkan. Justifikasi manajemen diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan waktu yang tepat dan tingkat laba fiskal di masa mendatang sejalan dengan strategi rencana perpajakan ke depan.

**Fair value of biological asset**

*Biological assets are measured at initial recognition and at each subsequent reporting date at fair value less estimated costs to sell, except when fair value cannot be measured reliably. The fair value of biological assets is determined based on the market price of the respective biological assets in an active market. An active market is a market in which the traded items are homogeneous, buyers and sellers can normally be found at any time, and prices are readily available. The carrying amounts of biological asset are disclosed in Note 12.*

**Revaluation of land fixed assets**

*The Company revalued its land fixed assets to reflect fair value based on the assessment of a qualified independent appraiser. This process involves significant judgment, including the frequency of changes in market value, the physical condition of the assets, and the availability of reliable market data. The revaluation is recorded in equity as a revaluation surplus, except in cases where an impairment must be recognized in profit or loss.*

*The estimates and assumptions used in the revaluation include capitalization rates, current market prices of comparable assets, as well as projections of economic and property market risks. Changes in these assumptions may have a material impact on the carrying amount of fixed assets and the Company's equity position. Therefore, management periodically reviews the approaches and assumptions used to ensure the reasonableness of the carrying value of fixed assets in Note 23.*

**Taxation**

*The Group operational under Indonesian tax laws. Significant consideration is required to determine the provision for income tax and value added tax. If the final tax decision is different from the amount originally recorded, the difference will be recorded in financial statement of profit (loss) and other comprehensive income in the period in which the results are issued.*

*Deferred tax assets are recognized on the recoverable tax amount in the future periods as a result of temporary differences that may be deducted. Management justification is required to determine the amount of deferred tax assets that can be recognized, in accordance with the appropriate time and future fiscal profit levels in line with the strategy of the future tax plan.*

**Kewajiban imbalan kerja**

Nilai kini kewajiban imbalan kerja tergantung pada sejumlah faktor yang ditentukan dengan menggunakan asumsi aktuarial. Asumsi yang digunakan dalam menentukan biaya bersih untuk pensiun termasuk tingkat pengembalian jangka panjang yang diharapkan atas aset program dan tingkat diskonto yang relevan. Setiap perubahan dalam asumsi ini akan berdampak pada nilai tercatat kewajiban imbalan kerja pada Catatan 36.

Asumsi tingkat pengembalian yang diharapkan atas aset program ditentukan secara seragam, dengan mempertimbangkan pengembalian historis jangka panjang, alokasi aset dan perkiraan masa depan atas pengembalian investasi jangka panjang.

Asumsi penting lainnya untuk kewajiban imbalan kerja sebagian didasarkan pada kondisi pasar saat ini.

**Employee benefit obligations**

The present value of the employee benefits obligation depends on a number of factors determined by using the actuarial assumptions. The assumptions used in determining the net cost for pensions include the expected long-term expected return on the program assets and the relevant discount rate. Any change in this assumption will have an impact on the carrying amount of the employee benefit obligations in Note 36.

The expected assumption of expected return on plan assets is determined uniformly, taking into account long-term historical returns, asset allocation and future forecasts of long-term return on investment.

Another important assumption for employee benefit obligations is partly based on current market conditions.

On March 13, 2024, BRI and SHS entered into a restructuring agreement of the previous credit arrangements based on Addendum No. 7 dated March 13, 2024, with the following terms:

BRI approved the request of SHS and PT Pertani (Persero) for an amicable settlement of the Working Capital Credit ("KMK") facility. Under this addendum, BRI approved the full transfer of the KMK facility to SHS, with a total outstanding balance of Rp1,185,708,908,313. The loan bears interest at 0.1% per annum, with a maximum step-up of up to 2% per annum, and an applicable rate of 0.50% for the year 2024. The facility matures on December 31, 2030.

SHS is required to dispose of fixed assets, whether pledged as collateral or not, that are not encumbered by other creditors, annually from 2023 through 2030, and apply the proceeds to the repayment of the loan principal.

Collateralized and non-collateralized assets must be sold within three years after the signing of this addendum. If no assets are sold within this period, all terms and conditions revert to the original loan agreement prior to this addendum.

SHS is also required to make cash payments from 2027 through 2030 totaling Rp160,379,126,813. If SHS fails to make the required payments in accordance with this schedule, all terms and conditions revert to the original loan agreement prior to this addendum.

As of December 31, 2023, SHS did not comply with the financial covenant requirements; accordingly, all credit facilities have been classified as current liabilities in the consolidated financial statements.

("BRI")**

As of December 31, 2023, SHS also did not comply with the financial covenant requirements under its agreement with BNI; therefore, all related credit facilities have been classified as current liabilities in the consolidated financial statements.

Program pensiun imbalan pasti memberikan eksposur Perusahaan terhadap risiko aktuarial seperti risiko investasi, risiko tingkat bunga dan risiko gaji.

*The defined benefit pension plan exposes the Group to actuarial risks such as investment risk, interest rate risk and salary risk.*

Risiko investasi

Nilai kini kewajiban imbalan pasti dihitung menggunakan tingkat diskonto yang ditetapkan dengan mengacu pada imbal hasil obligasi korporasi berkualitas tinggi; jika pengembalian aset program di bawah tingkat tersebut, hal itu akan mengakibatkan defisit program

Investment risk

*The present value of the defined benefit plan obligation is calculated using a discount rate determined by reference to high quality corporate bond yields; if the return on plan asset is below this rate, it will create a plan deficit.*

Risiko tingkat bunga

Penurunan suku bunga obligasi akan meningkatkan liabilitas program.

Interest risk

*A decrease in the bond interest rate will increase the plan liability*

Risiko gaji

Nilai kini kewajiban imbalan pasti dihitung dengan mengacu pada gaji masa depan peserta program. Dengan demikian, kenaikan gaji peserta program akan meningkatkan liabilitas program tersebut.

Salary risk

*The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.*

### (i) Risiko kredit

### (i) Credit risk

Risiko kredit adalah risiko di mana Grup akan mengalami kerugian yang timbul dari pelanggan/konsumen dan penyewa yang gagal memenuhi kewajiban kontraktual mereka. Instrumen keuangan Grup yang mempunyai potensi atas risiko kredit terdiri dari kas dan setara kas, dana dibatasi penggunaannya, piutang usaha, piutang lain-lain dan uang jaminan. Jumlah eksposur risiko kredit maksimum sama dengan nilai tercatat atas akun-akun tersebut.
